

Replacement Contact Lens By Mail Service

EyeMed Vision Care offers the option to purchase replacement contact lenses online through www.eyemedcontacts.com. Enjoy great savings on a variety of brand names, and have them mailed directly to your home!

How does the program work?

To order replacement contact lenses, follow these simple steps:

- ★★ Make sure your contact lens prescription is current and has not expired before placing your order.
- ★★ Log-on to www.eyemedcontacts.com.
- ★★ Enter the name of your vision care provider, type and quantity of lenses to purchase, as well as the requested billing* and shipping information.
- ★★ Eyemedcontacts.com will request the specific prescription from your eye care provider. Upon approval from your provider**, your lenses will be mailed directly to your home.

* This program is for replacement contact lenses only. If you have a contact lens allowance with your core benefit, it is not applicable to the replacement lens service. Expenses from this service are not a covered benefit – and are therefore not reimbursable.

** Some states do not require the provider to release the prescription.
