

## Web Developer Student Worker

City Campus - Lincoln, NE

### Job Description

The University of Nebraska is seeking a creative, part-time Web Developer who is interested in pursuing a career in web design or web development and is excited to try new things, learn new skills, and grow. Our goal is to create an environment that will hone your skills based on your interests.

The ideal candidate is passionate about creating excellent web experiences in a wide variety of websites that support the mission of the University of Nebraska. Candidate should also be knowledgeable in front-end web development technologies (HTML and CSS) and interested in growing in web design and/or web development. An internship position may be created for the right candidate.

### What You'll Do:

You'll be working in a small agile team responsible for the design, development and support of various University of Nebraska websites. Your role may include Front-End Development, Quality Assurance, Design, Back-End Development, Search Engine Optimization, Security, End-User Support, or other related area depending on interests.

### Qualification:

- Experience with HTML and CSS
- Ability to work independently and as part of a team in a dynamic environment
- Able to work 15-20 hours per week
